

What comes to your mind
when you
hear the term
"artificial intelligence"?

How do you think AI
is already impacting
our daily lives?

Do you think AI will eventually
replace certain jobs?
Which ones and why?

What are some potential
benefits of AI for society?

Can you name some examples
of AI technology
that you use or interact
with regularly?

Are there any ethical concerns
or risks associated with
the development and use of AI?
What are they?

Do you think AI
should be regulated?
Why or why not?

Do you believe AI
will ever have emotions
like humans? Why or why not?

Have you ever seen a picture created by AI? What was your first impression?

Do you think AI-generated images can be considered art? Why or why not?

Do you think AI-generated images will make it harder to trust what we see online? Why?

How can AI-generated images be misused? Can you think of any examples?

What are some potential ethical issues with AI-generated images?

Do you think there should be regulations on the use of AI in creating images? Why or why not?

Do you think AI-generated images can evoke the same emotions as those created by humans? Why or why not?

Do you think human artists will always be needed, even with the advancement of AI? Why or why not?
